

PIPING

Improve Productivity with Technology

cuteQM
Quality Management

cuteQualityManager for Piping is an unique Software to manage the entire QA Activities and documentation

cuteQM

Specialized software solution to manage the entire QA activities while managing major piping projects. Starting from ITP, Material Inspection, RFI/AFI Inspection Management, Welder Lot, NDT, Commissioning and all the reports generation and documentation will be much easier with templates.

One Click Final Documentation

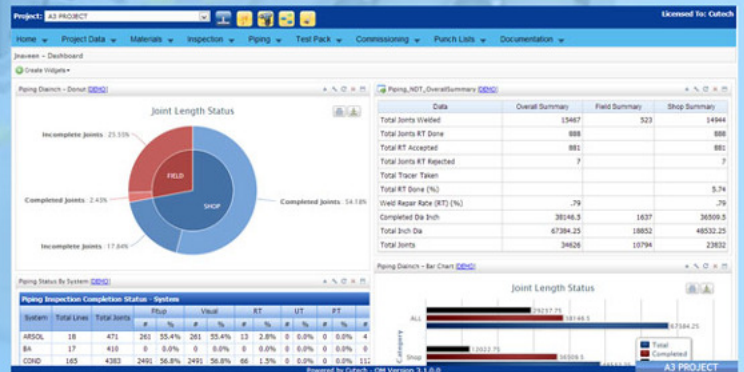

The Final Documentation can be generated very easily which usually takes months to compile. Keeps track of the missing documents as the project progress.”

The inspection can be carried out and instantly the data can be captured with the tablet PC.

The reports can be generated immediately for signatures as the inspection completed.

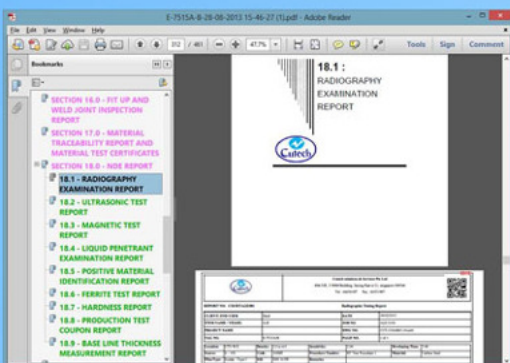

Avoids unnecessary paperwork and saves time.

The equipment calibration data and reports with appropriate reminder alerts

Key Features

- Manage WPS, PQR, Welders and WPQ
- Inspection Test Plan
- Project Schedule Monitoring (KPI)
- Welder Log & Welder Traceability
- Material Inward Inspections
- Defect Analysis
- Auto upload of signed documents
- User Customizable Interactive Dashboards & Reports
- Fitup/Weld Visual
- NDT Reports
- Field Joints Monitoring
- Spool Release
- Test Pack Preparation
- Punch list Monitoring
- Commissioning
