

# PCN NDT LEVEL II COURSES

## 2016 Schedule

The training programmes are structured according to the BINDT\*\* requirements. Each programme will provide an extensive understanding of the required NDT knowledge. It will be taught with extensive theoretical and practical works.

These courses will be applicable to individuals from all major industry sectors such as aerospace, metal fabrication, oil refinery, petrochemical, offshore, shipbuilding, construction, automation, ship-repairing and building construction industries.

The Training institute will provide comfortable, ambient space, well equipped lecture halls, separate practical training rooms with necessary equipments, accessories, flawed samples for testing.
